## Report on industrial visit

Shri Sairaj Shikshan Pratishthan's Vishwalata Arts, Commerce and Science College Bhatgaon Tal-Yeola Dist- Nashik we have managed Jalgaon here Jain Irrigation, Jain Food, Jain Hills, Tissue Culture Lab Pvt. Ltd. Visited this multinational company.

Firstly the secretary of the college Hon'ble shri. Prashant Dada Bhandare, Director Shri. Bhushan Laghave, Principal D.K. Kadam assisted the students in carrying out the activities and wished them abundantly.

The college is implementing new activities in the college for the purpose of cultivating students. While a student is studying, he needs to have only book knowledge but still he needs to get a deep understanding of India being an agricultural country and new technologies are being developed in it.

Knowledge of industrial trade, international, import-export is essential. A total of 22 students participated in the Department of Chemistry. Giving first-hand experience of things like driving, sprayer, fruit picker, study of crops and preparation of new plants as required for farming process in the company. Jain irrigation company Visited there are lots of benefits in students in future because all students farmers soon. Drip irrigation By 2050, there'll be 10 billion people living on our planet, and 20% less arable land per person to grow enough calories. Include increasing water scarcity, and it's clear why we need a way to increase agricultural productivity and resource efficiency. That's where drip irrigation fits in, changing the economics of global agriculture by allowing farmers to produce more calories per hectare and cubic meter of water. Reduce impact of drought and climate change on food production. Avoid contamination of ground water and rivers caused by fertilizer leaching. Support rural communities, reduce poverty, and reduce migration to cities.

India's food processing industries essential to the economy & employs millions of people every day. The food processing industries in very major source of farmer economy. The sector is estimated an contribute around GDP 15% in India.

Tissue culture is very important in biology due to its wide range of applications.

Both plant tissues can be used for culturing. For eg., Plant tissue culture helps in preserving an organ or tissue.

Plant Tissue culture may be used for genetic modification of a plant or simply increase its yield. the cells of the plants can be genetically altered to produce plants with desirable characteristics.

This technique utilizes the plant's ability to rejuvenate the tissues rapidly. It produces exact copies of itself known as clones It is a technique of quickly producing plants without any tubers, seeds or bulbs. It also helps in the conservation of plant biodiversity by the production of endangered plants.
